Description

The MDM6000 Satellite IP Modem is a versatile next generation modem optimized for a wide range of applications such as cellular backhauling, IP trunking and fiber restoration. The MDM6000 modem is typically installed at both ends of a point-to-point satellite link or at the remote sites of a star network. The unit can work as a modulator, demodulator or modem depending on the network configuration and integrates seamlessly with terrestrial networks and equipment. The modem is in full compliance with the DVB-S2 and DVB-S2X standards, achieving the highest possible efficiency at maximum service availability.

Efficiency at the Core

The Newtec MDM6000 Satellite Modem combines a number of innovative elements to improve current market available efficiencies, thereby lowering the overall Total Cost of Ownership.

New modulation and Forward Error Correction (FEC) codes up to 256APSK in the DVB-S2X standard in combination with innovative technologies such as 133 Mbaud, Clean Channel Technology®, Bandwidth Cancellation (BWC), Automatic Uplink Power Control (AUPC), FlexACM®, QoS, Shaping and Equalink® 3 are embedded in the modem and bring the satellite link to full efficiency.

Depending on the application, the Newtec MDM6000 Satellite Modem can be used in conjunction with the Newtec HUB6000 Satellite Hub. The performance can be increased even more by adding Newtec’s network optimization technologies, such as acceleration, compression and bandwidth management.

Optimal Availability

Newtec’s auto-adaptive technology FlexACM is incorporated in the MDM6000 modem and deals with fading conditions (rain, dust, interference) and inclined orbit satellites. Thanks to FlexACM, fading will no longer interrupt the transmission between the hub and remote sites nor result in loss of data. The maximum possible throughput can be achieved at all times. Additionally, the Automatic Uplink Power Control mechanism ensures maximum use of the link budget at all times.

Flexibility and Scalability Matching Market’s Business Models

The Newtec MDM6000 Satellite Modem is a versatile modem which allows service providers and government operations to increase the amount of services or the customer base within the same bandwidth. At the same time it introduces ways to reduce OPEX costs and increase the profitability of their business at maximum efficiency and optimum availability.

All modulation modes and maximum symbolrate are always available, the capability of the modem is determined by its IP throughput license with rates as low as 1 Mbps up to 425 Mbps in very granular steps. This makes the MDM6000 suitable for either low, medium or high speed links.

The built-in bandwidth canceller completely operates in the digital domain providing unsurpassed performance with the lowest possible residual cancellation noise resulting in the highest spectral efficiency. Non-linear post compensation (NLPC) performs real-time analysis of the complete received spectrum and reduces intermodulation interference that affects the demodulated carrier. Fractional licensing of the bandwidth cancellation option allows for cost-effective redundant setups.

A built-in spectrum analyzer and constellation diagram viewer assist monitoring and debugging.

The MDM6000 Satellite Modem can be easily monitored and controlled via a comprehensive front panel menu, CLI, advanced web GUI and via SNMP protocol. This enables easy integration into any industry-standard EMS/NMS system.
Support Services for your Professional Equipment

Care Pack Basic and Care Pack Enhanced are the Newtec service and support packages protecting your Newtec equipment over a three-year period.

Architecture

The MDM6000 Satellite Modem can be used at both ends of a point-to-point network or at the remote site of a star network. Depending on the configuration, the unit can be used as a modulator, demodulator or modem.

Related Products

- HUB6000 Satellite Hub
- MDM6100 Broadcast Satellite Modem
- USS02x2 Redundancy Switch
- FRC07x0 Frequency Converters Portfolio

Related Bandwidth Efficiency Technologies

- Clean Channel Technology
- Equalink 3
- DVB-S2X
- FlexACM
- Bandwidth Cancellation

Key Features

- Very granular rate licensing scheme with rates from 1 Mbps up to 425 Mbps bidirectional
- Suitable for low, medium and high speed applications, baud rates up to 133 Mbaud to handle all common transponder sizes
- Clean Channel Technology for additional bandwidth efficiency gains by allowing optimal carrier spacing
- DVB-S2, DVB-S2X (OPSK up to 256APSK)
- Newtec S2 Extensions (up to 64APSK) for closed network operation
- Default IF and L-band on TX and RX for ease of operation
- Optional Equalink 3 for linear and non-linear pre-distortion
- Reduce impact of RF Interferences (RFI) by enabling DVB RF Carrier ID (DVB-CID)
- All MODCODs and baudrates default enabled for flexible and optimal operation of the network

- Intelligent Uplink Power Control
- NLPC for intermod removal
- FlexACM for adaptive environments like variable interferences from rain and dust or for inclined orbit operation
- Standard GSE encapsulation for minimal overhead
- Support for MPE, ULE and XPE for working with legacy equipment
- Adaptive traffic shaping and bandwidth management allowing maximal SLA adherence even in case of ACM
- Advanced Quality of Service (QoS) for better customer experience
- Built-in spectrum analyzer and constellation diagram viewer
- Easy operation through secure front panel, SNMP, HTTP and CLI interfaces
- Modified OpenAMIP support to interwork with stabilized antennas from different vendors

SPECIFICATIONS
Input Interfaces

- Auto switching 10/100/1000 Base-T Ethernet interfaces
- GSE Encap/Decap performance
  - In (out 340 byte) 1500 byte
- TX only: 300 Mbps
- RX only: 360 Mbps
- TX + RX: 523 Mbps
- Max PPS (6 byte)
  - TX only: 120 kpps
  - RX only: 425 kpps
  - TX + RX: 220 kpps
- Maximum Data Rate
  - 425 Mbps simplex, 850 Mbps duplex
- Layer 2 bridge function: Ethernet over satellite (IPv6/VLAN/MPLS compatible)
- Layer 3 static router function: IPv4 packets over satellite
- Supports Jumbo frames (9216 bytes)
- Up to 100 routes
- Advanced QoS features
  - Adaptive Traffic Shaping on bitrate or symbolrate according to PIR/CIR
  - Flexible traffic classification on VLAN/MPLS/IPv4/IPv6
- GSE, MPE, XPE or ULE Encapsulation/
  - Flexible traffic classification on VLAN/MPLS/IPv4/IPv6
- Up to 64 receive filters
- GSE Encap/Decap performance

Modulation and Demodulation

SUPPORTED MODULATION SCHEMES AND FEC
- DVB-S2 (acc. ETSI EN 302 307 v1.2.1 for DVB-S2)

BANDWIDTH CANCELLATION (BWC)
- Max symbolrate: 72 Mbaud
- Delay range 0 to 500 ms
- Cancellation range: -10 to +10 dB local to remote carrier
- Cancellation ratio: > 30 dB
- Es/No degradation (dB) at 0 dB
  - QPSK: 0.03 dB
  - 8PSK: 0.05 dB
  - 16APSK: 0.10 dB
  - 32APSK: 0.20 dB
  - 64APSK: 0.44 dB
  - 128APSK: 0.80 dB
- Monitoring: delay, frequency offset, local/remote power, local/total power, phase noise
- Fractional license for redundant modem

FRAME LENGTH
- Short frames of 16200 bits for DVB-S2 and DVB-S2X
- Normal frames of 64800 bits for DVB-S2, DVB-S2X and Newtec’s S2 Extensions

CLEAN CHANNEL TECHNOLOGY
- Roll-off: 5% -10% -15% -20% - 25% - 35%

EQLANK 3
- Linear pre-distortion
- Non-linear pre-distortion for all MODCODs

CARRIER INTERFERENCE REDUCTION
- DVB RF Carrier ID
  - (CID according ETSI TS 103 129 v1.1.1)
- Spread Spectrum Modulator (BPSK)
- Supports User Data
- Compliant to DVB Standard

BANDWIDTH CANCELLATION (BWC)
- Max symbolrate: 72 Mbaud
- Delay range 0 to 500 ms
- Cancellation range: -10 to +10 dB local to remote carrier
- Cancellation ratio: > 30 dB
- Es/No degradation (dB) at 0 dB
  - QPSK: 0.03 dB
  - 8PSK: 0.05 dB
  - 16APSK: 0.10 dB
  - 32APSK: 0.20 dB
  - 64APSK: 0.44 dB
  - 128APSK: 0.80 dB
- Monitoring: delay, frequency offset, local/remote power, local/total power, phase noise
- Fractional license for redundant modem

BAUD RATE RANGE
- SCPC use: 0.256 Mbaud - 133 Mbaud
- BWX use: 1 Mbaud - 72 Mbaud

Physical
- Height TRU: width: 19”, depth 51 cm, 5.8 kg
- Power supply: 90-130 & 180-260 Vac, 125 VA, 47-63 Hz or 36-76 VDC, 160 W
- Temperature: Operational: 0°C to +50°C/+32°F to +122°F
  - Storage: -40° to +70°C/-40°F to +158°F
- Humidity: 5% to 85% non-condensing
- CE label and UL
